Experienced Full-Stack Developer with a strong track record of delivering high-quality, SEO-optimized, and scalable web applications. Specialized in creating responsive user interfaces and robust backend solutions, with expertise in frontend architecture, UI/UX design, and performance optimization. Successfully executed major projects, including company websites and business platforms, and ready to bring a creative, results-driven approach to your team for impactful contributions.

EXPERIENCE

Mega Oceans – Frontend Developer

📅 April 2023– Currently Working 📍 Hyderabad

- **Frontend Leadership:** Led the development of the frontend for Royal Mega Lotto and EasyFormations, guiding design and implementation decisions to ensure a high-quality user interface.
- **Technical Expertise:** Specialized in React.js, JavaScript, HTML, CSS, and Git, focusing on writing clean, maintainable, and scalable code.
- **Cross-Functional Collaboration:** Worked closely with backend teams to ensure seamless API integration and overall project success.
- **Optimization & Testing:** Improved performance, SEO compatibility, and user experience through testing and optimization for various devices and browsers.

PROJECTS

YouTube Clone

📅 November 2023

[Github Link](#) [Deployment Link](#)

- Integrated YouTube API to showcase content from 5 channels and 20 videos, ensuring real-time updates..
- Designed a user-friendly interface featuring a dynamic home page, subscriber's page, and detailed video pages with comments and replies. Used MySQL database to store/fetch data entered through API.
- Enhanced user engagement through interactive features, replicating the authentic YouTube experience within the cloned environment.

Personal Finance Tracker

📅 January 2024

[Github Link](#) [Deployment Link](#)

- Implemented a secure backend using Firebase to store user data, enabling seamless sign-in
- Developed a user-friendly app showcasing current balance, income, and expenses. Utilized pie diagrams for intuitive data visualization.
- Enabled easy entry, tracking, and sorting of financial data.

Podcast Platform

📅 January 2024

[Github Link](#) [Deployment Link](#)

- Created an interactive navbar with profile, "Your Podcasts," and "All Podcasts" pages.
- Enabled podcast creation and upload to Firebase for a diverse content library.
